Preface viii

CHAPTER ONE: The Origin of Life on Earth 1

How Geology Works 1
How Paleontology Works 2
The Origin of Life 3
Where Did Life Evolve? 11
Energy Sources for the First Life 12

CHAPTER TWO: Earth's Earliest Life 16

How Do We Know the Age of a Fossil? 18
Life Alters a Planet 19
Earth's Oldest Rocks 21
Earth's Oldest Cells 22
Earth's Early Atmosphere and Climate 24
Banded Iron Formations 25
The Oxygen Revolution 26

CHAPTER THREE: Sex and Nuclei: Eukaryotes 29

Symbiosis and Endosymbiosis 29
Eukaryotes in the Fossil Record 32
Evolution and Natural Selection 33
The Evolution of Sex 34
The Classification of Eukaryotes 36
Cladistics 37

CHAPTER FOUR: The Evolution of Metazoans 42

Proterozoic Protists 42
Evolving Metazoans from Protists 43
Evolution and Development in Metazoans 47
The Variety of Metazoans 49
Snowball or Slushball Earth 50

CHAPTER FIVE: The Cambrian Explosion 54

Ediacaran (Vendian) Animals 54
The Evolution of Skeletons 56
The Burgess Fauna 58
Solving the Cambrian Explosion 59

CHAPTER SIX: Changing Life in a Changing World 64

Diversity Patterns in the Fossil Record 64
Global Tectonics and Global Diversity 65
Changing Faunas Through Time 69
Increase in Global Diversity 73
Extinction and Mass Extinctions 73
The Permo-Triassic (P-T) Extinction 75
Evolutionary Radiations 80

CHAPTER SEVEN: The Early Vertebrates 84

Vertebrate Origins 84
The Evolution of Jaws 88
Bony Fishes 91

**CHAPTER EIGHT:
Leaving the Water 95**

- The Origin of Land Plants 95
- The Earliest Land Floras 98
- Comparing Plant and Animal Evolution 101
- The First Land Animals 102
- Air Breathing 104
- Limbs and Feet: Why Become Tetrapod? 107
- The First Tetrapods 110

**CHAPTER NINE:
Tetrapods and Amniotes 113**

- Early Tetrapods 113
- Amniotes and Amniota 117
- Carboniferous Land Ecology 121

**CHAPTER TEN:
Early Amniotes and
Thermoregulation 124**

- The Amniote Radiation 124
- Pelycosaurs 125
- Pelycosaur Biology and Ecology 126
- Vegetarian Pelycosaurs 128
- How Does Herbivory Evolve in Tetrapods? 129
- Thermoregulation in Living Reptiles 130
- Permian Changes 132
- The Invasion of Gondwana 133
- Therapsid Evolution 134

**CHAPTER ELEVEN:
The Triassic Takeover 139**

- Diapsids 139
- The Triassic Diapsid Takeover: The Pattern 141
- Respiration, Metabolism, and Locomotion 143
- Rhynchosaurs 146
- Locomotion and Triassic Archosauromorphs 146
- Dinosaur Ancestors 149

**CHAPTER TWELVE:
Dinosaurs 151**

- Theropods 151
- Ornithischians 156
- Sauropodomorphs 157
- Dinosaur Paleobiology: Life at Large Size 159
- Dinosaur Behavior 161
- Dinosaur Eggs and Nests 163

- Were Dinosaurs Warmblooded? 164
- Dinosaurs with Feathers 166
- Doubts about Endothermy? 169

**CHAPTER THIRTEEN:
The Evolution of Flight 176**

- Flight in Insects 177
- Parachuting Vertebrates 179
- Pterosaurs 181
- Birds 185
- Bats 192

**CHAPTER FOURTEEN:
The Modernization of Land
and Sea 196**

- Mesozoic Ocean Ecosystems 196
- The Modernization of Land Plants 203
- Mesozoic Plants and Pollination 204
- Mesozoic Plants and Seed Dispersal 206
- Angiosperms and Mesozoic Ecology 209

**CHAPTER FIFTEEN:
The Origin of Mammals 213**

- Evolving Mammalian Characters 214
- Mammalian Reproduction 218
- Early Mammals 220
- Therian Mammals 223
- The Inferiority of Mammals 225

**CHAPTER SIXTEEN:
The End of the Dinosaurs 228**

- An Asteroid or Cometary Impact? 229
- A Giant Volcanic Eruption? 231
- Did a Catastrophe Cause the Extinctions? 231
- Paleontological Evidence From the K-T Boundary 232

**CHAPTER SEVENTEEN:
Cenozoic Mammals: Origins,
Guilds, and Trends 238**

- The Evolution of Cenozoic Mammals 239
- Ecological Replacement: The Guild Concept 244
- The Savanna Story 248
- Evolution by Improvement 250

**CHAPTER EIGHTEEN:
Geography and Evolution 255**

Australia 255
New Zealand 258
South America 259
Africa 262
Islands and Biogeography 264

**CHAPTER NINETEEN:
Primates 267**

The Living Prosimians 268
Earliest Primates 268
The Origin of Anthropoids 271
Emergence of the Hominoids 274

**CHAPTER TWENTY:
Evolving Toward Humans 278**

Australopithecines 279
The Appearance (or Not) of *Homo* 283

Homo erectus: the First "Real" *Homo*? 286
The Origin of *Homo sapiens* 289
The Neanderthals 290
Evolution Among Humans Today 293

**CHAPTER TWENTY-ONE:
Life in the Ice Age 297**

Ice Ages and Climatic Change 297
The Present Ice Age 299
Life and Climate in the Ice Ages 300
Continental Changes 301
The Americas 304
Australia 307
Island Extinctions 308
Experienced Faunas 310
The World Today 312

Index 316
