

## Table of Contents

### Preface

#### Theme 1: Project Introduction, History, Case and Experience of Rockfill Dam

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| Review and Suggestions on CFRD Construction .....                                                            | 3   |
| <i>Zhao Zengkai (China)</i>                                                                                  |     |
| Deformation Control of the 200 m High Hongjiadu Concrete Faced Rockfill Dam .....                            | 15  |
| <i>Yang Zeyan, Jiang Guocheng (China)</i>                                                                    |     |
| Repair of CFRDs in the Dry and Underwater: Salt Springs and Turimiquire .....                                | 25  |
| <i>Sequera R., Perazzo P., Scuero A., Vascetti G. (Venezuela)</i>                                            |     |
| Mazar CFRD Dam: Main Features on Design and Construction .....                                               | 37  |
| <i>Marcelo G. Costa, Efrén Estrella, Manoel S. Freitas Jr. (Ecuador)</i>                                     |     |
| Technical Progress of CFRD Constructed on Deep Alluvium .....                                                | 45  |
| <i>Xu Zeping (China)</i>                                                                                     |     |
| Construction of Lianghekou Earth-Core Rockfill Dam<br>on Yalong River .....                                  | 53  |
| <i>Wu Shiyong, Shen Manbin, Xi Zhiyong (China)</i>                                                           |     |
| Design and Construction Techniques for a Safe Planning and Execution of High CFRDs .....                     | 59  |
| <i>Bayardo Materón (Brazil)</i>                                                                              |     |
| A Case – Study of Cua – Dat CFRD in Vietnam .....                                                            | 67  |
| <i>Giang Pham Hong, Michel Hotakhanh (Vietnam)</i>                                                           |     |
| The Asphalt Core Embankment Dam: A Very Competitive Alternative .....                                        | 73  |
| <i>Wang Weibiao, Kaare Höeg (China)</i>                                                                      |     |
| Nam Ngum 2 Hydroelectric Power Project Encountered Technical and Economical<br>Challenges .....              | 83  |
| <i>Pratoomkhuan Ngarmsirilertsgoon, Sakolkiat Puangpatcharakul (Laos)</i>                                    |     |
| Gibe III: A Zigzag Geomembrane Core for a 50 m High Rockfill Cofferdam in Ethiopia .....                     | 93  |
| <i>Pietrangeli G., Pietrangeli A., Scuero A., Vascetti G. (Italy)</i>                                        |     |
| Rockfill Dam Engineering Practice in Huizhou Pumped Storage Power Station .....                              | 101 |
| <i>Liu Yajun, Zhang Peng (China)</i>                                                                         |     |
| Construction and First Impounding of the Tokuyama Dam .....                                                  | 107 |
| <i>Hino Koji, Soda Hideki (Japan)</i>                                                                        |     |
| Dam Safety & Water Resources Planning Project in Sri Lanka – Special<br>Consideration on Rockfill Dams ..... | 115 |
| <i>Sudahrma Elakanda, Madusha Chandrasekera (Sri Lanka)</i>                                                  |     |

## Theme 2 : Design and Analysis

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Achievements and New Considerations on Re-constructing of Diversion Tunnel into Spillway Tunnel in High Earth and Rockfilled Dams ..... | 125 |
| <i>Guo Jun , Gao Jizhang (China)</i>                                                                                                    |     |
| Spillway Hydraulic Issues in Rebuilding Embankment Dams – Experiences from Vattenfall's Dam – Safety Program .....                      | 133 |
| <i>James Yang , Malte Cederström (Sweden)</i>                                                                                           |     |
| Adaptability of Slab Joint Waterstop to Very High CFRD .....                                                                            | 141 |
| <i>Hao Jutao , Lu Yihui , Jia Jinsheng , Du Zhenkun , Dou Tiesheng (China)</i>                                                          |     |
| Design of Concrete Face Slab for 182 m High NN2 CFRD .....                                                                              | 151 |
| <i>Aphichat S. , Pastsakorn K. , Weerayot C. , Rawee S. (Thailand)</i>                                                                  |     |
| Design and Verification Analysis on the Maopingxi Asphaltic Concrete Core Wall Embankment Dam of the Three Gorges Project .....         | 159 |
| <i>Xu Tangjin , Yu Shengxiang , Yan Shuanghong (China)</i>                                                                              |     |
| Mesh Generation for 3-D Dynamic Analysis of Fill Dam .....                                                                              | 169 |
| <i>Ik - Soo Ha , Byung - Hyun Oh , Wan - Ho Lee (Republic of Korea)</i>                                                                 |     |
| Analysis on Engineering and Technical Characteristics of Shuangjiangkou Hydropower Project .....                                        | 177 |
| <i>Chen Bangfu (China)</i>                                                                                                              |     |
| Design Considerations of a High Rockfill Dam Nam Ngum 2 CFRD; Lao PDR .....                                                             | 183 |
| <i>Ruedi Straubaar , Eva van Gunsteren , Stephen Moll (Switzerland)</i>                                                                 |     |
| Finite Element Analysis of a Super High Earth Core Rockfill Dam on Deep Overburden .....                                                | 195 |
| <i>Pan Jiajun , Wang Mingyuan , Xu Han (China)</i>                                                                                      |     |
| The Desjarástífla Dam; Measures in the Foundation to Mitigate Adverse effects of Faults & Lineaments .....                              | 203 |
| <i>Pálmi R. Pálmason , Fjóla G. Sigtryggsdóttir (Iceland)</i>                                                                           |     |
| Study of Seepage Control Characteristics of Jinchuan Concrete Faced Rockfill Dam on Dadu River .....                                    | 213 |
| <i>Rong Guan , Pan Shaohua (China)</i>                                                                                                  |     |
| FEM Analysis of a Concrete Faced Rockfill Dam .....                                                                                     | 221 |
| <i>Gerd-Jan Schreppers , Giovanna Lilliu (Netherlands)</i>                                                                              |     |
| A New Method for Estimating the Deformability Modulus of Plastic Concrete-gotvand Dam Experience, Southwest Iran .....                  | 227 |
| <i>Heidarzadeh M. , Sadr - Lahijani S. M. , Niroomand H. (Iran)</i>                                                                     |     |
| Numerical Analysis on Asphalt Concrete Core Rockfill Dam Using Elasto-Plastic Couple Constitutive Model .....                           | 237 |
| <i>Zhu Sheng , She Yapeng (China)</i>                                                                                                   |     |
| Irape Dam – Stress and Strain: Numerical Previsions and Measurement Results .....                                                       | 243 |
| <i>Alex Martins Calcina , Jânder de Faria Leitão , Reginaldo Araujo Machado (Brazil)</i>                                                |     |

|                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|-----|
| Numerical Analysis on Utilization of Soft Rock in Siping Concrete Faced Rockfill Dam .....                 | 253 |
| <i>Fu Jun, Zhou Xiaowen (China)</i>                                                                        |     |
| Trust is Good, Control is Better – Hidden Pitfalls in FE – Analysis .....                                  | 263 |
| <i>M. Holzmann, W. Fellin, M. Goltz, S. Perzlmaier (Austria)</i>                                           |     |
| 3D Finite Element Analysis on a 270 m Extra High Concrete Faced Rockfill Dam .....                         | 269 |
| <i>Sun Dawei, Li Nenghui, Deng Haifeng, Liu Junjian (China)</i>                                            |     |
| Study on Multi – Level Intakes in Lianghekou Project .....                                                 | 279 |
| <i>Zhang Wenyuan, Yang Fan, Zhang Dong, Zhang Rui (China)</i>                                              |     |
| Rational Design of Width of Earth Core for Rockfill Dams .....                                             | 285 |
| <i>Yoshikazu Yamaguchi, Hiroyuki Satoh, Naoyoshi Hayashi, Hisayuki Yoshinaga (Japan)</i>                   |     |
| Effects of Geotechnical Parameters on Discharge Coefficient of Inbuilt Spillways .....                     | 293 |
| <i>A. Tahershamsi, H. Bayat, J. Mahboubi, M. Geranmehr (Iran)</i>                                          |     |
| Research on Thermal Stress of CFRD Concrete Slabs under Condition of Cold Wave Attack ...                  | 301 |
| <i>Wang Ruijun, Chen Yaolong, Fu Guodong, Geng Jiji (China)</i>                                            |     |
| Relation of Permeabilities Between Materials 2 and 3A of the “El Cajón” Dam .....                          | 309 |
| <i>Abimael Cruz Alavez, David Yáñez Santillán, Juan Enrique Filloy (Mexico)</i>                            |     |
| Deformation Behavior of Concrete Face Slab Having Its<br>Lower Part Deeply Seated on Bedrock .....         | 317 |
| <i>Dong – Hoon Shin, Eun – Sang Im, Seong – Eun Cho, Han – Gyu Park, Wan – Ho, Lee (Republic of Korea)</i> |     |
| The Excavation and Treatment of Complex Karst Foundation of Aikou Reservoir Dam .....                      | 325 |
| <i>Zhang Zhixiong, Liu Jie, Xiang Qingwei, Xiong Jianning (China)</i>                                      |     |
| On Numerical Modelling of Internal Erosion in Embankment Dams .....                                        | 333 |
| <i>H. Mattsson, J. G. I. Hellström, T. S. Lundström, S. Knutsson (Sweden)</i>                              |     |
| Analysis of Thermal Stress and Drying Shrinkage of CFRD Concrete Slabs .....                               | 341 |
| <i>Kentaro Kido, Takeshi Nakamura, Takayuki Sano (Japan)</i>                                               |     |
| Three-Dimensional Hydrodynamic Model of Single Wall Sticking Tetrahedron Block .....                       | 351 |
| <i>Gao Zhu, Li Yongwu, Chen Hechun, Guo Hongmin (China)</i>                                                |     |
| Evaluation of Seepage Behavior<br>of Concrete Faced Gravel Fill Dam .....                                  | 357 |
| <i>Sung – Eun Cho, Dong – Hoon Shin, Eun – Sang Im, Han – Gyu Park, Wan – Ho, Lee (Republic of Korea)</i>  |     |
| Evaluation of Mechanical Behavior of Rockfill Materials Using the Hyperbolic Model .....                   | 365 |
| <i>A. Soroush, R. Jannatiaghdam (Iran)</i>                                                                 |     |
| <b>Theme 3 : Material</b>                                                                                  |     |
| A Study on Rockfill Properties of Tankeng CFRD .....                                                       | 375 |
| <i>Peng Yu, Chen Zhengwen, Tang Yang (China)</i>                                                           |     |

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Studies and Application of the Utilization of Crushed Siltstone in Core of Earth<br>Rockfill Embankment .....                               | 385 |
| <i>Peng Yunhe (China)</i>                                                                                                                   |     |
| Laboratory Hydraulic Fracturing Tests for Core Materials Using Large Size<br>Hollow Cylindrical Specimens .....                             | 393 |
| <i>Hiroyuki Satoh , Yoshikazu Yamaguchi (Japan)</i>                                                                                         |     |
| Study of Wide – Gradation Chisley Soil Compacting Test and Discussion of Compaction<br>Quality Control Method .....                         | 399 |
| <i>Li Xilin, Dong Yanping (China)</i>                                                                                                       |     |
| Experimental Studies on Volume Stability of Shrinkage Compensating Concrete Used in<br>Diversion Tunnel of Pubugou Hydropower Project ..... | 409 |
| <i>Ke Jie , Tu Yangju , Tian Qian , Yao Fuhai , Xiao Peiwei (China)</i>                                                                     |     |
| Properties of Compaction Reached in the Rockfills of the El Cajón Dam .....                                                                 | 415 |
