

Engineering minds, hearts and hands: Impact with a purpose

Thursday, October 24th from 9am until 12:30pm
University of Chile - Beauchef Campus
Faculty of Physical and Mathematical Sciences (FCFM)

The Faculty was founded in 1842 as part of the University of Chile, the first university in the country and one of the most prestigious and traditional in Latin America.

The FCFM has a strong participation in research and teaching at undergraduate and graduate levels in the fields of nine branches of engineering, basic sciences, earth sciences and astronomy.

We have 12 Advanced Research Centers with international networks related universities and institutions from 4 continents.

The visit will offer a meeting with the leaders of 6 strategic research areas: mining, energy and climate change, seismologic engineering, space technology, mathematical modeling and biotechnology / bioengineering.

- The visit will continue with the following tours :
- Advanced Mining Technology Center (AMTC).
 - National Seismological Center.
 - Space and Planetary Exploration Laboratory.
 - Center for Mathematical Modeling (Super computer lab).

Schedule

8.30am
Departure from Hotels in Santiago

9.30am
Reception with breakfast and meeting with scientific leaders from the U. of Chile

10.30am
Tour circuit begins

12.30pm
Departure from Beauchef Campus to hotels in Santiago
